

Reduce Email Cost

TurboGold® AutoZip™ provides the simplest automatic and transparency of Notes attached zip files. Stampede's award winning compression technologies lets you easily Zip, Cache and Accelerate your Notes email.

Accelerate your Notes Email

To get the most out of Lotus/Domino operating environment, data must be readily accessible. The data must be transferred between users and retrieved from storage quickly. Now with patented compression techniques you can dramatically reduce the size and cost of email attachments.

Total Transparency = No Training & No Decisions

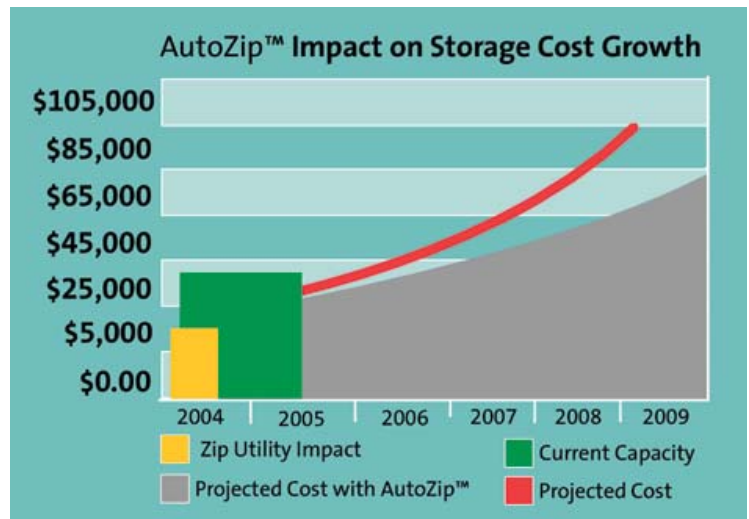

Utilize rich patent pending transparency

- **Total Transparency** means users do NOT have to determine what to zip or unzip. It is completely transparent.
- **Filtering Capabilities** provides flexible control for which the attachments are auto zipped.

Significant Compression & Savings

Compression Savings of over 85% have been attained and can be higher depending on data content.

- **No File Conversions**, data stays compressed regardless of platforms your users may be using (i.e. Notes R5, Notes R6 with LZ1, or Web etc.).

Really Easy Install

100% Automated set-up seamlessly integrates in the enterprise network.

Speed Data Access & Scalability

Scalability is essential for any organization

- **Built in Local Caching** allows faster access to commonly referred documents by retrieving data from the cache. Caching data avoids unnecessary processing, which in turn improves scalability.
- **See Statistics** on how much space saved and any faults that may have occurred.

To Install

Features	Benefits
Total Transparency	Completely conceals from the user the fact that attachments are auto zipped. No decisions, no translation kit, no alterations needed for Notes dialog boxes.
Security	Designed protection against unsafe files. Leverages the Notes/Domino architecture. No additional decisions for your users to make.
Installation	100% Automated set-up. Extremely easy to install, manage and deploy. <ul style="list-style-type: none">• Ultra-Low Footprint image deployed on a massive scale.• Full image which includes an optional user interface can be loaded easily.
Adaptive Compression	No file conversions. Data stays compressed regardless of platforms your users may be using; Notes R5, Notes R6 with LZ1, or Web etc.
Local Caching	Provide faster access to commonly referred documents.
Filtering	Flexible control for which the attachments are auto zipped. Can be done at Notes organization unit or other groups.
Administrative Settings	Built-in management over functionality. Database administrator can easily establish the rules.
Multi-Lingual	No need for translation. TurboGold® AutoZip™ works with any version of the Lotus Notes client in any language.
Log Files	Manage & track items easily with historical, troubleshooting, & error files.
User Practices	Increased employee productivity. Users can insert attachments, drag & drop, copy & paste, edit & forward.
Database Auto Zipping	Supports other applications (i.e. email, Notes application, etc.). The owner of the database can choose whether or not attachments should be stored into the database. Enterprise role-based set up is included.
Full-Text Indexing*	Optional full-text indexing of attachments if desired; at no extra cost.
Server Utility*	Most scalable system can adapt to increasing demands. <ul style="list-style-type: none">• Multiple Processing can run in incremental mode and have many concurrent instances of the program running simultaneously. This helps an enterprise server with multiple CPUs.
UpGradeable	Simply upgrade to TurboGold® Enterprise Edition or WebRider as your IT organization expands (e.g. QuickPlace, Web, J2EE, Wireless, Linux, etc.). Special discount pricing is available.

*requires TurboGold® AutoZip™ Server Utility

Stampede Technologies has been an IBM Business Partner since 1997 specializing in Lotus Notes and Domino acceleration solutions for global enterprises.
